

# Ruby on Rails Developer

Development, Lahore, PK

QBXNet is a startup incubator from Switzerland with its main business office located in Barcelona, Spain. We collaborate closely with our entrepreneurial clients to make exploratory and exciting projects in web, mobile and AR/VR happen. Our goal is to provide a platform to implement business ideas fastly and with exceptional quality. make exploratory and exciting projects in web, mobile and AR/VR happen. Our goal is to provide a platform to implement business ideas fastly and with exceptional quality.

For our development hub in Lahore, we are looking for a great Ruby on Rails Developer to join our existing team and help them both build new products and work on existing processes. You will be part of a range of workstreams from improving existing server and operation processes over translating functional requirements to code to developing new products from scratch. To be both successful and have fun in this position, you have to be a team player with both a strong background in Ruby on Rails development and a creative mindset.

## Primary Responsibilities

- Develop new products and applications
- Improve existing engineering and server operation processes
- Translate functional requirements to code
- Identify scaling bottlenecks and propose solutions
- Enhance testability of our applications and APIs
- Give technical feedback on early concepts
- Analyze and resolve technical and application problems
- Research, benchmark, and evaluate new technologies
- Maintain git & svn repositories across multiple threads

## Requirements

- Ruby on Rails - You need to have worked with RoR over a couple of product cycles to know the best practices. You should be aware of the way RoR framework evolved over the last couple of years
- Software Design Patterns - You should have honed your problem solving skills by mastering software design patterns. Like a skillful tactician, know what strategy is suitable for its relevant contexts
- Front-End Familiarity - You need to be familiar with front-end basics in order to be amazing at the backend. If not your best, HTML, CSS, and Javascript should be your good friends
- Passion for Product Development - Yes, we love building products, show us what you have built with your blood & sweat

## Your Profile

- Bachelor's degree in Computer Science or Computer Engineering
- Experience with Javascript and AJAX heavy web application development
- Familiarity with our software stack, which consists of Ruby/Ruby on Rails, PostgreSQL, MongoDB, Heroku, Resque, Redis, Git, Rspec, Unicorn & Nginx, Javascript, and angular.js

## About Us

- We love innovation and new technologies
- We exclusively work on exciting products in which we honestly believe
- We believe in working with outstanding people and giving them great opportunities they deserve
- Our culture is creative and results-driven
- We believe in flat hierarchies; everybody is encouraged to bring in his or her opinion and ideas
- Be entrepreneurial and challenge our thoughts, or present us your own ideas - we will be happy to discuss how we can make it happen

QBXNet is an equal employment opportunity employer. Qualified applicants will receive consideration for employment without regard to any personal aspects. We are increasing our team size continuously and currently grow on a fast pace together with our customers across Europe and in the US. It's a great time to join.
